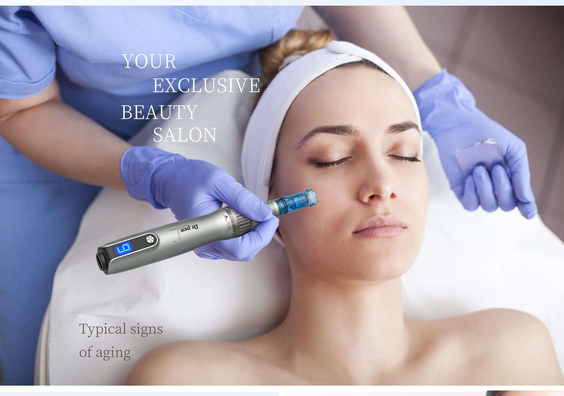
The number of speed flashes slowly when the battery capacity 10% left

The pen turn off automatically after 1 minute while the number of speed flashes quickly .

The pen can't start when the pen show "L"

Skin Care



Promote skin regeneration

Microneedling is minimally invasive. The technique involves using multiple tiny, sterile needles to puncture the skin and cause physical trauma. Microneedling increases the production of collagen and other healing factors by causing trauma to the skin. Collagen is an essential protein that helps keep the skin looking youthful, with a firm, smooth, and stretchy texture.

Solve kinds of problems

Accelerate pigment metabolism, whiten and tender skin, remove acne mark, dilute chloasma and reduce acne pits, improve stretch marks, reduce pores and fine lines.
