

i-STAT System

Accelerating care at the patient side...

Simple Operation

A single drop of blood is easily and comfortably applied to the self-contained cartridge. Sample is taken while cartridge is outside the Handheld, for greater ease.

Blood sample is applied and wicked instantly into the cartridge. Once sample is applied ...

... simply insert it into the Handheld. Test will initiate automatically, delivering results in just minutes.

The fully automated *i-STAT System* offers a broad menu of tests for diagnostic and treatment indicators related to disease state management and clinical practice guidelines.

Granted Waived Status for lithium heparin and sodium heparin whole blood venous samples only.
