The ultrasound- and ecg-gels produced and marketed by us on the basis of our own formula and the individual production technology we developed are well known and widely distributed all over in the international market.

The excellent quality of our gels, and other medical accessories is acknowledged in many countries around the world, since UltrageL's products are present in Asia, Africa, Europe, Far & Middle Eastern Countries as well. Thanks to the commercial structure of the company covers the entire national territory in a capillary manner and it exports to more than 34 countries worldwide.

Proper product quality of the produced medical items is ensured through applying precise production technology and strict controls, based on a closed production system and on a continuously developing equipment park. Controlling under the International System Standards the digital PH-measuring, computerised viscosity control, digital water quality examination and microbiological report also assure best production level.

In compliance with our traditions our goal is to provide our customers top quality services, also meeting the high quality standards. UltrageL is a Company with Certified Quality Management System in accordance with ISO 9001:2008 quality assurance system from TÜV Rheinland, EN ISO 13485:2012. All UltrageL products are CE marked according to Directive 93/42/EEC.

The production takes places on 2000 square meters in Budapest, where is together international and domestic sales. We are also taking care of R&D, warehousing, logistics, and administration purposes.
