Vibrations that will  
change your life!

HOME OF MORA®

## Pioneers of the bio-resonance method!

Despite all scientific progress, medicine still faces certain limits in the treatment of diseases and preserving health. Med-Tronik has been researching alternative treatment methods for almost 40 years.

We have managed to develop a form of diagnosis and treatment that is gentle, long-lasting, and painless: the MORA® system.

Med-Tronik is a pioneer of the bio-resonance treatment, and continues to set standards in the further development and optimisation of biophysical medical technology.

What started as a family company almost 40 years ago is now an international corporation.

Our devices are developed to comply with clinics, doctors, dentists, veterinarians, naturopaths and further health professions as well as with global players of the beauty and wellness industry.

We set new standards in medical technology.

# Medical technology in the 21st century:

## Production of medical devices

Production site  
OEM acc. to DIN ISO 13485:2016  
Agent for CE-Certification

## Research & Development

professional customer  
support

# MORA<sup>®</sup> Nova

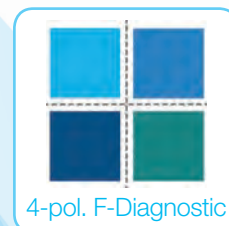

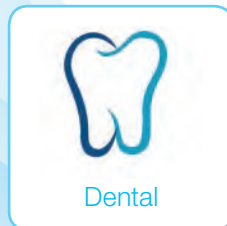

**Modern,  
clear design**

**Easy  
to operate**

**Extended treatment  
and diagnostic options**

**Based on latest  
research findings**

- Reliable 2-channel technology
- Integrated ELH function (2 channels)
- Multilingual display
- Integrated PC
- Modern measurement stylus
- Graphic representation of measurement points
- Integrated network connection
- User-friendly touchscreen
- Integrated input and output beakers
- Retractable foot console
- Plug system coded in terms of colours
- Online updates possible
- Amplification 0,1 to 1 Million per channel
- Extendable via modules
- Programs with up to 16 single steps

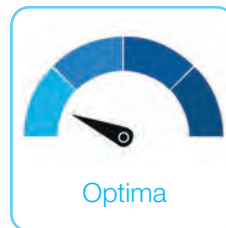

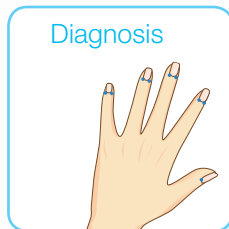

**Approved  
user friendliness**

**Extended  
treatment- and diagnosis  
options**

- Reliable 2-channel technology
- Additional ELH function
- Modern measurement stylus
- External PC
- External input- and output beaker
- Plug system coded in terms of colours
- Amplification: 0,1 to 100 per channel
- Programs with max. 4 single steps

Multiple  
possibilities of diagnosis  
and treatment with  
MORA® extensions

## Gentle treatment with good vibrations

The MORA<sup>®</sup> bio-resonance method with proven 2-channel technology stimulates the body's self-healing powers to eliminate disturbances and blockades.

The patient is connected to the MORA<sup>®</sup>-device by electrodes on hands, feet, and head. The patient's vibrations are transmitted to the device via these electrodes, and, depending on the clinical picture and treatment program, are converted into appropriate frequency patterns. Afterwards, the vibrations are returned to the patient.

- **The patient often feels an improvement after the first treatment**
- **Most patients perceive the treatment as very pleasant**
- **The treatment is painless**
- **Short duration of treatment (approx. 5-30 minutes)**

### Analysis

In the first consultation, the treatment is discussed and the initial analysis is carried out. All open questions are answered here.

### Diagnosis

Together, the patient and the therapist decide what the main points of the treatment will be. What are the aims, and how long will a treatment session take?

Worldwide engagement for your patients' health.

Multiple applications possibilities, gentle, long-lasting and multifunctional!

### Treatment

The patient's vibrations are transmitted to the device and are converted into appropriate frequency patterns. The vibrations are returned to the patient via the output electrode.

### Conclusion

The results of the treatment are checked during the final consultation. All possible further measures are discussed during this conversation.
