

A brand of MED-TRONIK GmbH.  
World leader in bio-resonance technology!

For beauty  
and more joy in life

**MEDICAL.GR**  
Dedicated to Health

# Even professionals are

**Beauty is a key issue of our times. But what does beauty actually mean? Is it the visual appearance, the influence of fashion? Is beauty dependent on your current mood?**

**The term “beauty” covers almost all aspects of human existence. For us, beauty means that we recognize every individual’s personal look and therefore also their own individual beauty ... and that is exactly where the concept from MORA®Beauty takes its lead!**

# amazed by the effects!

## Amazing results ...

In the early 70s of the last century, Dr. med. Franz Morell and his son-in-law, engineer Erich Rasche, researched bio-resonance. Their groundbreaking discoveries led to the construction of biophysical, technical medical devices.

In 1977 they developed the unique MORA®-Therapy: A holistic diagnostic and treatment procedure with patented MORA®-oscillations.

Over the years, the devices, software, and applications have been continuously improved. A great deal of effort and expense is put into extensive testing of the MORA® products at the research laboratory.

The latest product that has emerged from this work is MORA®Beauty. The applications are intended for women and men who would like to preserve or recreate their natural beauty. There are invigorating as well as relaxing applications for your skin, hair, nails, and personal charisma. The subjective well-being is the main focus of all applications.

The applications have been thoroughly tested, and their effectiveness has been confirmed in numerous internal studies. Even professionals are impressed: Never before has there been such a gentle, sustainable, and effective application.

**MORA®Beauty – the latest spa trend for beauty and more joy in life.**

... and more!

# This device sets new standards in bio-resonance technology!

Nine out of ten women over 30 can testify to the frustration they experience due to cellulite on their thighs and buttocks. Even top models and movie stars are not spared.

The weakness of the skin and underlying tissue is indeed a solely cosmetic problem – however, for the women concerned, this is only a small consolation.

Despite great promises from numerous manufacturers, treatments are often very expensive and lengthy and remain until today without any significant or long-term success - mainly due to the lack of a scientific basis.

**MORA®Beauty is different –  
MORA®Beauty is effective!**

The ultramodern combination of the latest bio-resonance technology and intelligent software leads to visible results after only a few applications.

All modules can be installed and used individually as well as in combination with each other.

But MORA®Beauty can do even more: Specific software modules expand the application spectrum. There are pleasant relaxation and stress reduction applications as well as the visible reduction of wrinkles, sustainable detoxification, and weight reduction or treatments for nails, skin, hair, and eyes. In addition, a module has been developed specifically for quitting smoking.

**9 out of 10 women confirmed  
a noticeable immediate effect!**

 **MORA<sup>®</sup> Beauty**  
ENJOY THE DIFFERENCE

# Four modules ensure well-being

## Module 1:

### Biophony

(incl. headphones)

The biophony module is primarily used for relaxation, detoxification, stress reduction, and revitalisation.

In addition, it includes a variety of applications for skin, hair, nails, and eyes.

- ✓ **Skin and hair**
- ✓ **Nails and eyes**
- ✓ **Relaxation and stress reduction**
- ✓ **Detoxification and revitalisation**

## Module 2:

### Non-Smoking

Quitting smoking – a big challenge! Making the decision is the first step into the right direction. Now you just have to make all necessary preparations with the help of the module for quitting smoking. Really soon there will be absolutely nothing blocking the way to a smoke-free life! This is the chance to quit smoking successfully – without chemicals or medication and almost no withdrawal symptoms!

- ✓ **Support to help you quit smoking**

Studies show a **success rate of 87.7%**

## Module 3:

### Weight Control

Many people dream of getting to grips with their weight, not just for a short period of time, but for the long-term. These people want to stop comfort eating, control their appetite, and stop their night-time visits to the fridge.

The module for weight management is just the right thing: Various applications to optimise your diet will help to lose weight, to detoxify and to revitalise yourself completely – without the yo-yo dieting and without feeling hungry!

- ✓ **Detoxification and weight reduction**

#### Module 4:

## JeNu

(incl. UV active electrode)

JeNu is the perfect application for cellulite. An UV active electrode ensures that the skin becomes smooth and soft – without any side effects.

The painless application is safe, extremely pleasant, and offers lasting results.

**Cellulite**

**Anti-wrinkle applications for facial, neck, and cleavage areas**

# No more “orange-peel skin”

When summer is approaching and people prefer to stay outside in the fresh air wearing short, loose clothing, their joy is often overshadowed very soon. For many women, the same old problem areas such as thighs or bottom show signs of unsightly bumps and dimples of orange peel-like skin caused by cellulite. Nine out of ten over thirty years old suffer from this. Cellulite is a cosmetic problem caused by weak tissue.

Finally, there is an option for those affected to iron out the unwanted fatty deposits: Simply and gently, and with a lasting effect. JeNu from MORA®Beauty will provide beautiful, smooth legs, thighs, and a firm bottom, using all new methods. Laboratory-tested vibrations penetrate the tissue, providing a perfect balance. Unpleasant substances can simply be flushed away. The application is absolutely painless, and the experience is regarded as very pleasant. And that is no coincidence: The MORA®Beauty procedure is performed without any side effects at all and has no negative impact.

Experience how MORA®Beauty pampers your body and soul.

## Cellulite?

Beautiful smooth skin – instead of an orange-peel texture.

## Problem area cellulite – Answers to your questions

### **How many applications are usually needed to achieve visible results?**

In most cases there is a visible difference immediately after the first application. However, we would recommend an application once a week over a period of eight weeks, to achieve the best possible result with long-term effects.

### **Do the results have a lasting effect?**

An observational study has shown that in most cases, it is sufficient to check the result six months after the last of the eight applications and then to refresh it with a further application. Depending on your individual situation and your lifestyle, a further refresh or series of applications may be beneficial after three to six months.

### **Are there noticeable differences between the application results?**

Depending on the degree of cellulite as well as individual general conditions, the application results can vary accordingly.

### **Are there any side effects?**

No. Compared to other anti-cellulite treatments like procedures with vacuum, laser, electricity, injections or complex, high-risk surgery, the application with MORA®Beauty is completely painless and has no side effects.

### **For whom is the use of the MORA®Beauty application not suitable?**

The MORA®Beauty application is not suitable for patients with pacemakers, patients who suffer from epilepsy, or for pregnant women.

# The most innovative milestone since the development of MORA®-Therapy

## The benefits of MORA®Beauty:

- The ideal device for beginners
- Secure, fast, delegable operation
- Real help thanks to painless application
- Modern design
- Expandable through modular design
- Portable and therefore perfectly suited for mobile use

# Technical data

- Reliable 2-channel technology
- Multilingual display
- Network compatible
- Transportable with lockable touchscreen
- No battery, therefore no battery service
- User-friendly touchscreen
- Integrated input beaker
- Integrated foot console
- Microsoft Windows networks or peer-2-peer
