

Lighted Ear Curette™ with Magnification

Bionix® Lighted Ear Curettes combine illumination and magnification to help healthcare providers take less time to see and safely remove cerumen from the ear canal.

PROBLEM

Ear curettage requires three hands. One hand to brace the patients head and straighten the ear canal, one to maneuver the curette and one to position a light to avoid blindly digging in the ear.

SOLUTION

The Lighted Ear Curette with Magnification brilliantly illuminates the ear canal eliminating the practice of blindly curettaging the sensitive area.

RESULTS

Complete visualization shortens procedure time and increases efficacy.

“Bionix Lighted Ear Curettes have really changed our practice. We can quickly and painlessly clean out ears. We love them!” - Nancy Van Keuls, M.D.

POTENTIAL REIMBURSEMENT (U.S. ONLY)

CPT Code/Description

69210 - For potential reimbursement of impacted cerumen.
