

# seca 704

Wireless column scales  
with capacity of up to  
300 kilograms 

**EMR-integrated**

- Network-capable with seca 360° wireless technology.
- Accurate, extremely robust seca scale technology for up to 300 kg.
- TARE, pre-TARE, mother/child-function, HOLD, auto-HOLD et BMI.
- Optional measuring rod expands scale into a measuring station.

## seca 704:

### The multi-faceted talent with network capability.

**W**eighing small children to obese patients – the new seca 704 can do it all. Especially when it comes to finding out BMI and height. Then there are two options: integrate a mechanical measuring rod or receive data wirelessly from a separate digital stadiometer. And everything that the seca 704 weighs, measures and calculates is efficiently transmitted with seca 360° wireless technology to the software seca analytics 115 on your PC or to the 360° wireless printer advanced seca 466 and 360° wireless printer seca 465. If you like.

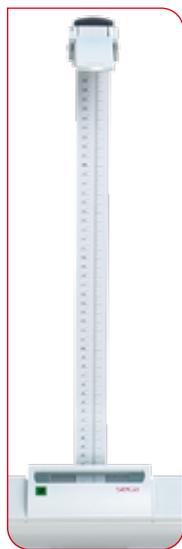

#### 300 kg capacity can handle it all.

Heavyweight or obese patients can easily and safely step onto the large, flat platform of the seca 704. Nothing wobbles, nothing threatens a secure foothold, thanks to the solid base of cast iron and a non-slip surface of ribbed rubber.

With the seca 360° wireless technology, at the press of a button the seca 704 can send results to an optional seca wireless printer or to the seca software on your PC.

#### The BMI Function simplifies your work.

Especially with the BMI the seca 704 is your able assistant. It even helps to determine the patient's height, mechanically with the optional, fully integrated measuring rods seca 220 and seca 224 or very conveniently with the digital 360° wireless stadiometers seca 264 and seca 274. The results are sent to the scale, which then calculates the BMI from the patient's weight and height.

#### Pre-TARE, mother/child function, HOLD and auto-HOLD shorten the time.

Do you want to deduct a stored value, e.g., clothing, from the patient's weight? Press Pre-TARE. Or weigh a child held in a parent's arms? Do it with the mother/child function. Need to store the results quickly now for reading later? Good thing the scale has a HOLD key. And if desired, the auto-HOLD can be activated via the menu.

#### Paperless and error-free wireless transmission of measurements.

With the seca 360° wireless technology the seca 704 can transmit measurements to the optional seca 360° wireless printer. With the network-capable software solutions seca analytics 115 or seca emr flash 101 and wireless USB adapter seca 456, your PC can receive and analyze measurements and forward them to an Electronic Medical Record (EMR) system. Thus the seca 704 is EMR integrated and ready to handle digital patient records and all the demands the future will bring. More information about EMR integration is at [www.seca.com](http://www.seca.com).

## seca 704

### Technical Data

- Capacity: 300 kg
- Graduation: 50 g < 150 kg > 100 g
- Dimensions (WxHxD): 360 x 930 x 520 mm /
- Platform (WxHxD): 335 x 80 x 345 mm
- Weight: 14.9 kg
- Power supply: Batteries / power adapter (optional)
- Data transmission: seca 360° wireless technology
- Functions: TARE, pre-TARE, mother/child-function, HOLD, auto-HOLD, BMI, auto-CLEAR, damping, automatic switch-off, kg/lbs switch-over, SEND/PRINT
- Optional: measuring rod seca 220 and seca 224, power adapter seca 447, switch-mode power adapter seca 400
- RS232 compatible
- Calibration class:  $\text{M}$
- System compatible with: 360° wireless printer seca 466 advanced, 360° wireless printer seca 465, software seca analytics 115 and seca emr flash 101, 360° wireless USB adapter seca 456, stadiometers seca 274 and seca 264
